endoscopic arthroscopic
synovectomy in a patient

with non-rheumatoid chronic anterior shoulder instability. The endoscopic arthroscopic synovectomy technique can be used to treat a variety of shoulder conditions and has been shown to be an effective treatment for patients with rheumatoid arthritis. We present a case of chronic anterior shoulder instability with a successful endoscopic arthroscopic synovectomy to address recurrent anterior shoulder instability. The patient was

followed post-operatively and has demonstrated good clinical and radiological outcomes. Uncategorized
